

Satlink Software Release Certificate

SRC No/Rev:	SL03-00303-1_7_0
Main Product:	Satlink FB150 BDU
Main Product No:	SL40-00906
Software No/Rev:	SL70-00303
Software Name:	Satlink FB150 BDU Firmware
Software Version:	1.7.0
Release date:	07/03/2014
File name:	SAT-FB150-r01.7.0.fb (SAT-FB150-r01.7.0.zip)
File size/checksum:	8.118.272 bytes (zipped:8.103.443 bytes)
Comments	<p>From 1.6.5 has been added:</p> <ul style="list-style-type: none">• Supports China SAS.• Includes support of Static Routing Rules and Remote Access Static Rule.• Includes support of IPSec/IKE pass-through ALG to allow IPSec VPN traffic (with option to enable or disable via MMI).• Includes Korean language to the WebConsole (WebMMI) language options.• Includes configurable GPS Output baud rate.• Supports limited factory reset using Safe-Mode button.<ul style="list-style-type: none">○ When the UT is already in Safe Mode, pressing and holding the Safe Mode button for 5 seconds will reset the UT's IP address to its default IP address (192.168.1.35) and will also reset the related Ethernet configurations such as the Netmask and the DHCP pool. This is to allow user to access the UT when the user forgets its IP address after having it changed earlier.• Includes a protection mechanism to prevent change of DHCP pool in single user mode (direct mode).• Includes fix for a bug that causes SIM-PIN feature not working sometimes when enabled. <p>This release is an official release to be used on Inmarsat site and other Satlink Distributor sites for common download.</p>

Where and when to be used (Mandatory, Optional, Recommended)

Finished Goods	Recommended
Work In Progress	Mandatory
Returned Equipment For Repair	Recommended
Units In Field	Recommended
